

# HIV & Youth

Did you know not all youth (aged 13-24) with HIV are getting the care they need?

**Of youth diagnosed with HIV:**

**68%**

linked to care  
within 1 month

**55%**

retained in care

**44%**

virally suppressed\*

[www.cdc.gov/hiv](http://www.cdc.gov/hiv)

\*virus at low enough levels to stay  
healthy and reduce transmission risk

Based on the most recent data available in April 2017

Get Tested. Get in Care. Stay in Care. Live Well.
